### **CLOSING EVENT: CARLO & SIMONA TRUZZI SHOW**

**Carlo and Simona Truzzi** will be the protagonists of the Closing Ceremony of the eighth edition of the **Ca' Foscari Short Film Festival**, during which they will delight the audience of the Auditorium performing in a surprising show of the ancient tradition of shadow art. This magical world of shadows and shapes will allow the audience to very well say they have been “playing with light”.

Carlo and Simona are the most skilled **shadow artists** on a global level. Shadow art is a specific animation technique that allows you to create shadow figures that stand out on a clear surface through the movement of the hands and a simple source of light. They are the authors of a comic and imaginative reinterpretation of the ancient form of entertainment used in the Far East to amuse people in the streets. Their four-handed numbers create silhouettes of famous people using only the simply essence of the shadow: famous singers, actors and television characters take shape through the dance of their hands.

Carlo and Simona have performed in theatres all over the world, also alongside internationally renowned artists such as Céline Dion, Phil Collins, Paco de Lucia, Zucchero, Gloria Gaynor, Gipsy King, Sofia Loren, Alberto Sordi and many others.

### **VIDEO-OKE!**

The **Ca' Foscari Short Film Festival** offers for the fourth consecutive year the **Video-oke!**, a game that has been a great success in the past editions.

The VIDEO-OKE! (video + karaoke = videoke) merges the well-known format of karaoke to the world of cinema, creating a playful situation in which the recorded acting of the actors of a film is replaced by the live performance of the player. Players use their own voice to play on a private video base of sounds (or voices only), in the same way in which in the karaoke follows a recorded instrumental base without lyrics. During this program, the Short Film Festival cooperates with high schools in the province of Venice to create a playful relationship with the audio-visual media, offering students a fun way to get closer to film and at the same time to present an innovative way of fruition.
